

```
package com.example.phms.model;

public abstract class User {
    protected int id;
    protected String name;
    protected String email;
    protected String role;

    public User(int id, String name, String email, String role) {
        this.id = id;
        this.name = name;
        this.email = email;
        this.role = role;
    }
}
```
